ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite):

1. There are 7.541 acres of certified NRCS delineated wetlands located within the project area.
2. The USGS Quad Map & National NWI Maps support onsite information provided by NRCS, and the isolated PEMA/PEMC wetland determination.
3. There are no tributaries feeding in or out of the subject wetland site. The nearest stream is about 3/4 to a mile distant to the NNE. NRCS staff report that hydrology at the subject site comes from rainfall via sheet flow, and run-off from the irrigated crop circle this site falls within.
